Polymer Degradation and Stability **21** (1988) 379–381

CONTENTS OF VOLUME 21

Number 1

Effects of Initial Molecular Weight on Thermal Degradation of Poly(methyl methacrylate): Part 1—Model 1 1
ATSUSHI INABA, TAKASHI KASHIWAGI and JAMES E. BROWN (USA)

Thermal and Ablative Properties of Rocket Insulator Compound Based on EPDM 21
A. SAHA DEURI, ANIL K. BHOWMICK, R. GHOSH, B. JOHN, T. SRIRAM and S. K. DE (India)

Influence of Non-ionic Nitrogen Containing Anti-static Agents (Tensides) on the Oxidative Stability of Polyethylene: Part 1—Photo-oxidation of Tensides and of Liquid Hydrocarbon in the Presence of Tensides. 29
M. PORUBSKA, A. ZAHRADNICKOVA and J. SEDLAR (Czechoslovakia)

Photo-degradation of Blends of Polystyrene and Poly(methyl methacrylate) . 43
AYAKO TORIKAI, YUKIHIRO SEKIGAWA and KENJI FUEKI (Japan)

Polymer Precursors of Polyacetylene. Thermal Degradation of Poly(Vinyl Esters). Part 1—Molecular Weight Dependence of the Autocatalytic Thermal Degradation of Poly(Vinyl Acetate) (PVAc) 55
J. M. BARRALES-RIENDA, M. SÁNCHEZ CHAVES, J. M. MAZÓN ARECHEDERRA and F. FERNANDEZ MARTÍN (Spain)

Degradation of Polymers by Mechanical Forces and Chemically Active Media . 73
T. E. RUDAKOVA and G. E. ZAIKOV (USSR)

Book Review 91

Number 2

Electrical and Thermal Stability of Chemically Synthesized Conductive Polypyrrole–Halogen Complexes 93
K. G. NEOH, E. T. KANG and T. C. TAN (Singapore)

Stressed Polymers in Physically Active Media 105
T. E. RUDAKOVA and G. E. ZAIKOV (USSR)

Polymer Degradation and Stability (**21**) (1988)—© 1988 Elsevier Applied Science Publishers Ltd, England. Printed in Great Britain

Influence of Non-ionic Nitrogen Containing Anti-static Agents (Tensides) on the Oxidative Stability of Polyethylene: Part II—Interaction Between Tensides and Hydroperoxide in Equimolar Solutions 121
M. PORUBSKÁ and M. KRKOŠKOVÁ (Czechoslovakia)

Influence of Non-ionic Nitrogen Containing Anti-static Agents (Tensides) on the Oxidative Stability of Polyethylene: Part III—Interaction Between Tensides and Hydroperoxide Over a Wide Range of Molar Ratios 139
M. PORUBSKÁ, K. ANTOŠ and P. HODÚL (Czechoslovakia)

A Study of the Thermal Degradation Behaviour of Polyesters Based on Hexolic Anhydride 151
G. SIVASUBRAMANIAN, P. SIVASAMY (India),
C. T. VIJAYAKUMAR and J. K. FINK (Austria)

Thermal Dehydrochlorination and Stabilisation of Poly(vinylchloride) in Solution: Part II—Effects of HCl Readdition Reaction 165
TRAN VAN HOANG and A. GUYOT (France)

Surface and Bulk Oxidation of Low-density Polyethylene Under UV-Irradiation 181
RALF GIESSE and MARCO-A. DE PAOLI (Brazil)

Book Review 189

Number 3

Influence of Non-ionic Nitrogen Containing Anti-static Agents (Tensides) on the Oxidative Stability of Polyethylene: Part IV—The Influence of Tensides on the Weathering of Polyethylene Film 191
M. PORUBSKA, R. KRB & L. WELNITZ (Czechoslovakia)

Solvation Stabilization of Vinyl Chloride Polymers to Degradation in Solution . 205
K. S. MINSKER, M. I. ABDULLIN, R. R. GIZATULLIN,
A. L. BUCHACHENKO & G. E. ZAIKOV (USSR)

Stabilisation of PVC with Organotellurium Compounds 211
S. S. ABED-ALI, W. R. McWHINNIE & G. SCOTT (UK)

Novel Studies on the Thermoelectro-mechanical Properties of Tantala-doped Zirconia Refractories 227
M. A. EWAIDA, M. M. ABOU SEKKINA, E. M. EBRAHIM &
A. A. AL-ADAWY (Egypt)

Biodegradation of Polyethylene and the Influence of Surfactants 237
SIGBRITT KARLSSON, OLLE LJUNGQUIST &
ANN-CHRISTINE ALBERTSSON (Sweden)

Thermal and Photo-chemical Degradation of Nylon 6,6 Polymer: Part II—Influence of Hindered Piperidine Light Stabilisers 251
NORMAN S. ALLEN, MICHAEL J. HARRISON & GORDON W. FOLLOWS (UK)

Oxidative Degradation of Polyethylene in the Presence of Phase Transfer Catalyst: Part I—Infrared Studies 263
J. KONAR & R. GHOSH (India)

The Photo-oxidation of EPDM Rubber: Part 1—Kinetics of Oxygen Consumption 277
MARCO-A. DE PAOLI (Brazil) & G. GEUSKENS (Belgium)

Number 4

Kinetic Principles and Mechanisms of Hydrolytic Degradation of Mono- and Polyacetals—A Review 285
V. V. PCHELINTSEV, A. YU. SOKOLOV & G. E. ZAIKOV (USSR)

Primary Thermal Fragmentation Processes in Poly(ethylene oxalate) Investigated by Mass Spectrometry 311
ALBERTO BALLISTRERI, DOMENICO GAROZZO, MARIO GIUFFRIDA, GIUSEPPE IMPALLOMENI & GIORGIO MONTAUDO (Italy)

Antioxidative Efficiency of Substituted *N*-Phenyl *N*-Pyrazolyl-3, *N*-Phenyl *N*-Benzimidazolyl-2 and *N*-Benzthiazolyl-2 *N*-Benzimidazolyl-2 Amines in the Thermooxidation of Polypropylene 323
L. MATISOVA-RYCHLA, J. RYCHLY (Czechoslovakia), M. MESKE & M. SCHULZ (GDR)

Interaction of Cu^{2+} with Ethanedioic Acid Bis-hydrazides 335
E. BLATT, H. J. GRIESSER, J. W. LODER & A. W.-H. MAU (Australia)

Thermodynamic Aspects of Degradation with Particular Reference to Unsaturated Polyester Resins 345
J. K. FINK (Austria)

Acetone-Catalysed Degradation of Lithium–Potassium and Sodium–Potassium Copolyphosphates 355
H. N. BHARGAVA, RITA RANI SRIVASTAVA & MANJU SINGH (India)

Benzophenone-initiated Photo-crosslinking of Polynorbornene in the Solid State 365
S. K. WU (China) & J. F. RABEK (Sweden)

Book Review 377
